Architectural Excellence

The NCRC's bold design combines functionality with visual impact. A standout feature of the NCRC is its flooring in the fitness center, where **REGUPOL aktivpro** High-Performance Rubber Tiles provide a foundation tailored for athletic excellence. These interlocking modular tiles were specifically selected for their durability, shock absorption, and ability to withstand the rigors of fitness training. Designed to support athletes in every workout, the **REGUPOL** flooring minimizes strain on joints while offering a stable, slip-resistant surface. The tiles are not only functional but also environmentally conscious, containing recycled material. This aligns with the NCRC's sustainability goals, making the flooring a key element in the center's achievement of Net-Zero Energy and Zero Carbon Emission benchmarks.

A Legacy of Excellence

As a hub for training and competition, the Neil Campbell Rowing Centre sets a new standard for athletic facilities. The integration of sustainable design, innovative features, and performance-driven details—such as the **REGUPOL aktivpro** flooring—ensures the center's role as a world-class destination for athletes and spectators.
